Next Generation Manufacturing Canada – Sparking a New Economy

Financial Due Diligence

NGen will undertake a financial assessment of each participating member to ensure they can support their commitment to the project for the entire duration of the project. To this end, and predicated on the value of the Total Project Costs, we will require:

- Cashflow forecast and / or description of how the project will be funded
- Copy of latest financial statements, or link to where this is available
- If financial statements are not available, state reason why?

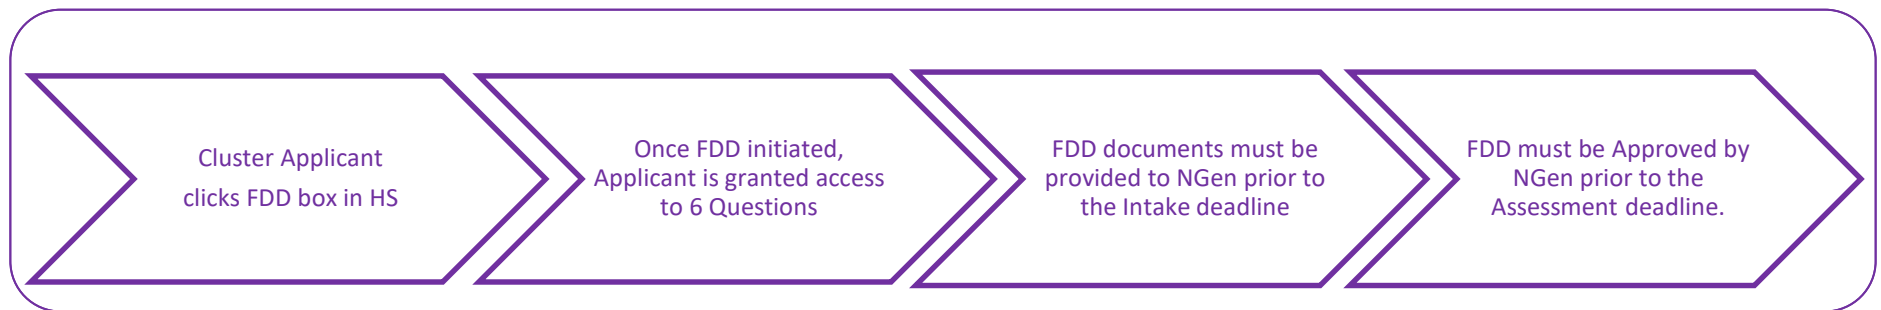

Factors from the financial statements which will be evaluated include but not limited to:

- Profitability [Net profit margin which shows the company's ability to generate earnings after taxes]
- Liquidity [(Current Ratio = Current Assets / Current Liabilities). The higher the ratio, the better as an indicator of a company's liquidity.
- Leverage/Indebtedness e (Debt ratio = Total Liabilities / Total Assets). Ideally, a ratio of 0.5 or less is ideal.
- Cashflow [from the Statement of Cashflow; positive cashflow is ideal]

In the event the supporting financial information provided by the applicants is insufficient to demonstrate the ability to complete the planned project as proposed, NGen Canada will undertake one of the following actions:

- Request additional information from the participating member
- Reject the proposed program on the grounds that the company(ies) do not appear to have the ability to fund the proposed project to completion
- Approve the project for a reduced amount of NGen funding until such time the participating members can provide further assurances on liquidity
